

MVR TYPE FLOAT VENT VALVE

When there is a fuel overflow in the breath line to which the stainless steel ball inside is connected, it rises along with the liquid and seats itself in its socket, preventing fuel transfer to other tanks. It continues to allow vapor passage.

TECHNICAL SPECIFICATIONS

Type : MVR

Diameter : 3"x3"x2"

Max. Operatine Pressure : 0,3 Mpa

Ambient Temperature : (-30 - +60) °C
